

Prompt given to the models:

Write one concise alt-text sentence describing what is feeding on what.

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score
	Seaweed atop rocks.	1	Dark brown kelp and red algae cover rocks in an intertidal zone, with no visible animals feeding.	1

[iNaturalist](#)

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score
 iNaturalist	Bird eating a small animal.	0 Bird not eating; starfish sits separately	A seagull feeds on a starfish on a paved surface.	1
 iNaturalist	"Fish with long antennae feeding on water surface in fish aquarium."	0 No antennae; it's a leech on the fish	A leech feeding on a fish.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score
 iNaturalist	Hand holding a scallop.	0 It's a plant gall, not a scallop	An insect has fed on a brown plant gall, leaving a bubbly, clear substance inside its cavity.	1
 iNaturalist	Slug feeding on slime mold.	0 It's a snail, not slime mold	A dark, slug-like creature is feeding on a snail.	1
 iNaturalist	The octopus is feeding on an underwater coral reef.	0 It's an anemone with a fish, not an octopus	A sea anemone feeds on a sunfish caught in its tentacles.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score
 iNaturalist	Shellfish in a shell.	0 Vague; it's a flatworm on a slug	A dark flatworm is feeding on a brown slug.	1
 iNaturalist	Bee feeding on flower.	1	A fuzzy insect with patterned wings feeds on the underside of a bright green leaf.	1
 iNaturalist	Crab in the water near a seagull.	0 No crab; it's a red mollusk	A bird feeds on a large, reddish marine mollusk.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score
 iNaturalist	"An underwater coral reef with anemone, possibly a sea anemone, surrounded by red and orange algae."	0 Nudibranch on sea squirts, not coral	A nudibranch feeds on colonial sea squirts.	1
 iNaturalist	Caterpillar on plant.	1	A pale, segmented larva is feeding on green plant leaves.	1
 iNaturalist	The image does not provide enough context to confidently describe what is feeding on what.	1	A spider's web on a rough surface, trapping small particles as food.	0 No spider web visible; just rock texture

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score
 iNaturalist	Starfish chewing off bird's foot.	0 Bird eating starfish; foot not chewed off	A seagull swallowing a purple starfish.	1
 iNaturalist	Moth feeding on tree sap.	0 Butterfly on a stem; no sap	A reddish-brown predatory flatworm is engulfing a moth on a green stem.	0 Snout butterfly, not a flatworm eating a moth
 iNaturalist	"A leaf on the ground is being consumed by a small animal."	0 No animal visible consuming the leaf	A millipede feeds on decaying matter on the forest floor.	0 No millipede visible in the image
 iNaturalist	Feeding insects found on a leaf.	1	White scale insects feeding on a green leaf.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score
 iNaturalist	Mushrooms growing from green shells.	0 Broken shell fragments, not mushrooms	Predatory snails drilled into these mollusk shell fragments.	1
 iNaturalist	Branch with a green plant on it.	0 Misses the gall; only a vague branch	An organism inside a brown gall is feeding on the tree branch.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score
 iNaturalist	Spores are feeding on the plant.	0 Misidentifies rust fungus as spores	Orange rust fungus is feeding on a green leaf.	1
 iNaturalist	Duck swimming with a fish in its mouth.	0 Not a fish; eider is eating a sea urchin	A male Common Eider duck eating a sea urchin.	1
 iNaturalist	This is an image of a plant with blueberries. There are also pine cones present in the image. It depicts a healthy, bushy plant with green needles and vibrant blue fruits. The background is mostly out of focus, but it appears to be a natural setting with greenery and possibly other plants. This type of image could be used for various purposes such as botanical education, gardening inspiration, or culinary references related to berries and pine cones.	0 Juniper galls, not blueberries or pine cones	A brown parasitic gall feeds on a juniper branch with blue berries.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score
 iNaturalist	Bug on bug.	0 Vague 'bug on bug'; no clear prey	A ladybug feeds on mealybugs.	0 Ladybug with a pupa; no mealybugs, not feeding
 iNaturalist	Leaves of tree are spotted and being eaten by insects.	0 Spots are fungal disease, not insect feeding	A fungus is feeding on green leaves, causing numerous dark brown spots and browning edges.	1
 iNaturalist	Mold growing on dead leaf.	1	A dark, bumpy fungal infection is feeding on a yellow autumn leaf.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score
 iNaturalist	Fish, a green fish with a clear body and blue fins, is resting on top of a sea urchin, which provides a habitat for various small marine life.	0 Isopods swarming the fish, not resting on urchin	A sea anemone feeds on a small, iridescent fish.	0 Isopod crustaceans on fish, not an anemone
 iNaturalist	Green leaf covered in black and yellow spots with rusty edges, likely from moisture, feeding on a healthy green plant.	1	A leaf disease is feeding on the green leaves, causing yellowing and dark brown spots.	1
 iNaturalist	Mushroom growing out of a fallen tree stump.	0 Misses the slug; only mentions mushroom	A yellow slug feeds on a mushroom.	1
 iNaturalist	A bug eating another bug.	0 Not bugs; slug on a dead newt	A slug feeds on a deceased newt on sandy ground.	1

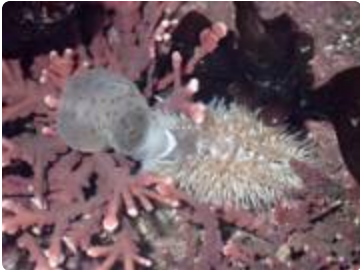

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score
 iNaturalist	Moss covering moss.	0 It's lichen, not moss on moss	Bright yellow lichen appears to be feeding on and spreading over a pale lichen and green moss.	1
 iNaturalist	This is a close-up image of a sea anemone attached to a coral. The anemone has tentacles that are likely extended in an attempt to catch passing prey or food particles. It's common for these marine animals to attach themselves to structures like rocks, reefs, and corals, which provide them with the necessary food and protection from predators.	0 Snail is feeding on the anemone, misidentified	A translucent sea snail feeds on a white sea anemone amidst pink coral-like growth.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score
 iNaturalist	Fungi growing on decaying wood.	0 On a dried leaf, not decaying wood	Small fungi feeding on a dried leaf.	1
 iNaturalist	Snail eating a slug.	0 It's a worm, not a snail	A dark, shiny ribbon worm feeds on a light-colored mollusk.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score
 iNaturalist	Moss growing on lichen.	0 Lichen with pink parasite, not moss on lichen	Pinkish-red lichen parasite growing on grey-green lichens.	1
 iNaturalist	Slug feeding on green moss.	0 These are velvet worms, not a slug on moss	Velvet worms feeding on a woodlouse.	1
 iNaturalist	Clam in open shell, partially submerged.	0 Triton sea snail, not a clam	A red sea star is feeding on a conch inside its shell.	0 No sea star or conch; it's the snail's own body

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score
 iNaturalist	Bird with orange feet eating fish.	0 Oystercatcher near urchins, not eating fish	A Black Oystercatcher feeds on a purple sea urchin.	1
 iNaturalist	"Person holding a leaf that has been eaten by insects."	0 Spots are fungal rust, not insect-eaten	Leaf rust is feeding on the green leaf.	1
 iNaturalist	Leaves with visible insect damage.	0 Powdery mildew, not insect damage	White powdery mildew feeds on a green leaf.	1
 iNaturalist	The leaves are infested with insects.	0 Leaves look healthy; no infestation visible	A pale, slug-like larva feeds on a textured green leaf.	0 No larva visible feeding on the leaves

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score
 iNaturalist	Slug on plant leaf.	0 It's a snail with a shell, not a slug	A brown-shelled snail feeds on a green leaf.	1
 iNaturalist	Oyster shell on sandy shore.	0 It's a clam/bivalve, not an oyster	A small bivalve is filter feeding while attached to a larger, tar-covered bivalve shell.	0 Single bivalve shell; no filter feeding visible
 iNaturalist	An open-mouthed seagull eating a sea anemone.	0 Gull eating a sea star, not an anemone	A seagull is eating a starfish.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score
 iNaturalist	Red flower with multiple layers of petals.	1	Tiny insects feed on the vibrant pink, brush-like flower.	0 No visible insects feeding on the flower
 iNaturalist	Plants growing in the cracks of a sidewalk.	0 Shrub beside sidewalk, not growing in cracks	A small green shrub covered in numerous galls, indicating insect feeding.	0 No visible galls or insect feeding
 iNaturalist	Shellfish in a river.	0 Vague; it's a snail, not just 'shellfish'	A dark mollusc feeds on a large, spotted snail underwater.	0 Single snail; no second mollusc feeding on it

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score
 iNaturalist	Dead leaves are feeding on tree.	0 Nonsensical; dead leaves don't feed on tree	Fungus feeds on a plant, creating dark spots on its green leaves.	1
 iNaturalist	Leaf with spots feeding on plant	0 Nonsensical; leaf isn't feeding on plant	A green leaf with dark fungal spots and ragged edges, indicating it has been fed upon by disease and an insect.	1
 iNaturalist	A butterfly is perched on a yellow flower.	1	An orange-brown butterfly sips nectar from yellow flowers.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score
 iNaturalist	Bee on a purple flower.	0 Orange skipper butterfly, not a bee	An orange butterfly drinks nectar from purple flowers.	1
 iNaturalist	A large fly preys on a small crustacean in water.	0 Water striders, not a fly and crustacean	A water strider feeds on a bee on the water's surface.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score
 iNaturalist	Moss feeds on wood.	0 It's a plant gall, not moss on wood	A brown, fuzzy insect gall hangs from a thorny plant stem.	1
 iNaturalist	A frog eating a bug.	0 Two frogs, not a frog eating a bug	A larger frog is swallowing a smaller frog.	1
 iNaturalist	No animals are feeding in the image.	1	A hawk feeds on yellow prey, its beak stained red. No yellow prey or red beak visible	0

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score
 iNaturalist	A bird, perched on a tree branch, is eating something off the ground.	0 Eating a squirrel on a branch, not off the ground	A hawk feeds on a squirrel, gripping it with its talons on a mossy branch.	1
 iNaturalist	Bird droppings on the grass.	0 Hawk with bloody prey, not droppings	A hawk with a bloody beak feeds on a smaller bird.	1
 iNaturalist	Bird is feeding on insect.	0 Prey is a worm, not an insect	A bird feeding on a crab.	0 Prey is a worm, not a crab

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score
 iNaturalist	Aphids are eating the leaves.	0 Scale insects/mealybugs, not aphids	White, fuzzy insects are feeding on a green leaf.	1
 iNaturalist	Aphid is consuming a leaf.	0 Whitefly with waxy filaments, not an aphid	An adult whitefly and nymphs, surrounded by white waxy filaments, feed on a green leaf.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score
 iNaturalist	Aphid eating a leaf.	0 Black scale insect, not an aphid	A tiny pale insect feeds on a black, white-fringed insect on a green leaf.	0 One dark scale insect; no pale insect feeding on it
 iNaturalist	Bee feeds on purple wildflowers.	1	A bee feeds on a purple flower.	1
 iNaturalist	Bee pollinating wildflowers.	1	A honeybee feeds on a yellow flower.	0 Flowers are pale/white, not yellow

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score
 iNaturalist	Crane feeding on small pond.	0 Egret holds prey in beak, not feeding on a pond	A Great Egret holds a dark rodent in its beak.	1
 iNaturalist	Duck feeding on water	0 Vague; bufflehead with prey in beak	A Bufflehead duck feeds on a large, segmented worm.	1
