

Prompt given to the models:

Write one concise alt-text sentence describing what is feeding on what.
Examples:
A white ermine stands in the snow, holding a captured grey rodent in its mouth.
A close-up of caterpillar chewing through the edge of a green leaf.
A brown frog sitting on rocky ground, swallowing a spider with its legs protruding from its mouth.
A grey, crested bird perched in a leafy green bush feeds on a yellow tulip.
A leopard gripping a horned antelope by the neck in green grass.

 iNaturalist	Seagull standing on dock with crab in beak.	0 No crab in beak; it is a starfish on deck	A seagull feeds on a starfish on a wooden deck.	0 Seagull not feeding; starfish sits apart on deck	A seagull stands on a wooden boardwalk, looking down at a small starfish on the ground.	1
 iNaturalist	An image shows a red-orange fish floating close to the camera with its open mouth, inside of which is a small black object that resembles an eye patch or some other form of artificial enhancement for marine life.	0 Hallucinated eye patch; no black object in mouth	A dark, curved leech feeds on the side of a pale fish.	1	A dark leech is attached to the side of a small golden fish, feeding on its body.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score	Gemini 3.5 Flash	Gemini 3.5 Flash score
 iNaturalist	The image shows a human hand holding a brown and white nut or seed.	0 Not a nut; it is a hollowed plant gall	An insect larva feeds within the reddish, hollowed interior of a brown plant gall.	1	A close-up of a person holding an oak acorn cup filled with frothy, bubbling liquid produced by bacteria feeding on the plant tissue.	0 Frothy acorn cup; bacteria feeding claim fabricated
 iNaturalist	Slug feeding on snail.	1	A dark land planarian feeds on a snail.	1	A dark brown flatworm on rough ground feeds on a small, coiled snail.	1
 iNaturalist	Underwater coral reef fish feeds on algae.	0 No reef fish feeding on algae shown	A sea anemone feeds on a large pale fish.	0 Anemone with fish/object, not clearly feeding on fish	An orange sea anemone on the sandy seabed feeds on a large, round grey and white fish.	0 Relationship reversed; fish over anemone, not anemone feeding

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score	Gemini 3.5 Flash	Gemini 3.5 Flash score
 iNaturalist	The image shows a close-up of a black slug with a shell crawling over a rock surface.	0 Wrong; it is flatworm on slug, no shell	A dark flatworm engulfing a mottled brown slug.	1	A shiny, dark-colored flatworm wrapped tightly around a mottled brown slug on sandy, moss-covered ground, feeding on its prey.	1
 iNaturalist	The bee hovers over a white flower to feed.	0 No white flower; insect on green leaf	The fuzzy insect is not feeding on the green leaf.	1	A white, fuzzy fungus grows from and feeds on the body of a fly clinging to the underside of a green leaf.	1
 iNaturalist	An animal eating something on the ground.	0 Too vague to be useful	A grey bird stands in shallow water, feeding on a reddish sea slug.	1	A seagull stands on a wet sandy beach, looking down at a reddish-orange sea cucumber in the shallow water.	0 Object is a whelk shell, not a sea cucumber

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score	Gemini 3.5 Flash	Gemini 3.5 Flash score
 iNaturalist	A red and white anemone with red tentacles is feeding on an orange sea coral under water.	0 Not an anemone; misidentifies the nudibranch	A translucent nudibranch with brown markings feeds on a colony of orange-rimmed sea squirts.	1	A patterned, ruffled marine flatworm feeds on a cluster of translucent sea squirts with orange-rimmed openings.	1
 iNaturalist	Dormouse feeding on wild shrubbery.	0 Not a dormouse; it is an arthropod larva	A translucent, segmented arthropod curled around and feeding on green plant leaves.	1	A pale, segmented millipede curled around a sprig of green foliage, feeding on the leaves.	1
 iNaturalist	Close-up of sea coral feeding on rock surface.	0 Not sea coral; land rock/fungal surface	Translucent fungal mycelium appears to be feeding on a textured, granular surface.	1	A dirt-covered brown slug with an iridescent sheen crawls on and feeds on decaying wood.	0 Only rock/dirt texture; no slug or wood

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score	Gemini 3.5 Flash	Gemini 3.5 Flash score
 iNaturalist	The bird is using its mouth to eat fish with a spiky head.	0 Not a spiky fish; it is a starfish	A seagull swallowing a purple starfish.	1	A close-up of a grey seagull swallowing a bumpy, purple starfish.	1
 iNaturalist	Brown butterfly is feeding on orange flower.	0 Butterfly on stem, not feeding on flower	An orange slug is feeding on a brown moth on a green stem.	0 It is a butterfly on stem, not slug on moth	A reddish-orange velvet worm perched on a thin green stem feeds on a captured brown and white moth.	0 It's a butterfly, not a velvet worm eating a moth
 iNaturalist	An unidentified plant is feeding off of the ground.	0 Nonsensical; plant not feeding off ground	A reddish-brown centipede feeds on a dark ant on mossy ground.	0 No visible ant or feeding on mossy ground	A reddish-brown velvet worm on mossy ground feeds on a dark cricket among green grass blades.	0 Blurry grass and leaves; no velvet worm or cricket
 iNaturalist	The image shows two photos of a plant with holes in it that appear to have been eaten or bored into, possibly by insects or other creatures. The top photo is taken from a higher angle, showing more of the surrounding area, and the bottom one focuses on the damage to the leaf with a close-up view.	0 Describes holes; shows raised galls on leaf	Insect larvae feeding inside white galls on a green leaf.	1	A close-up of white scale insects feeding on a vibrant green leaf.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score	Gemini 3.5 Flash	Gemini 3.5 Flash score
 iNaturalist		0 Empty alt text	This image does not depict any organisms feeding on others.	1	A cluster of small, dark slipper snails stacked together on damp sand next to a US penny.	0 Broken shell fragments, not stacked slipper snails
 iNaturalist	This image depicts an object that resembles a snail, or possibly an insect with a white, spiral shell, crawling across the branch of a tree. The background is blurred but appears to be a wooded area with brown leaves and dirt. There is no text present in the image to provide additional context.	0 Not a snail with spiral shell	A bark-mimicking insect feeds on a tree branch.	1	A brown scale insect clings to a thin branch, feeding on the plant's sap.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score	Gemini 3.5 Flash	Gemini 3.5 Flash score
 iNaturalist	Moss growing on the surface of a leaf.	0 It is rust fungus not moss	Orange rust fungus feeds on a green leaf.	1	A close-up of a tiny, pinkish larva feeding on orange rust fungus spores on a green leaf.	0 Rust fungus on leaf; no larva feeding visible
 iNaturalist	Black and white duck swimming in body of water.	0 Misses feeding; wrong that it is generic duck	A male Eider duck on dark water, swallowing a sea urchin.	1	A male common eider swimming in dark, choppy water, holding a round, reddish-brown sea urchin in its wide-open bill.	1
 iNaturalist	Blueberries growing on a pine tree branch.	0 Junipers not blueberries; misses galls	An unseen organism feeds on a juniper branch, forming a brown gall.	1	A brown cedar-apple rust fungus gall grows on and feeds on a green juniper branch with blue berries.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score	Gemini 3.5 Flash	Gemini 3.5 Flash score
	Ant in front of beetle.	0 No ant or separate beetle present	An orange ladybug feeds on a fuzzy brown object.	1	An orange ladybug perched on a grey surface, standing over the fuzzy cocoon of a parasitic wasp that has fed on its body.	1
	Green moss feeding on a leaf with brown spots and black edges.	0 Not moss; misidentifies the spots	A leaf disease feeds on green leaves, creating numerous brown spots and some holes.	1	A leaf spot fungus feeding on green leaves, leaving scattered dark brown spots and lesions across their surfaces.	1
	Fungus feeding on dead brown leaf.	1	A black fungal growth consumes a yellow leaf.	1	A close-up of a black tar spot fungus feeding on a yellow maple leaf, creating a large, textured dark patch.	1

 iNaturalist	An aquatic fish with a silver body and a brown head is feeding on small green objects on rocks.	0 Fish is prey being eaten, not feeding	A translucent sea anemone feeding on a small, iridescent fish.	1	A translucent sea anemone on a rocky underwater surface, gripping a small, iridescent silver fish with its tentacles to feed on it.	0 Fish with isopod parasites, not an anemone eating it
 iNaturalist	The image shows a close-up of a plant with spotted leaves, which may be feeding on some kind of insect or parasite, but it is not possible to identify what is being fed upon in this description based on the available information.	0 Vague and wrongly suggests insect feeding	A fungal disease feeds on a green leaf, causing numerous dark spots.	1	A fungus feeds on a green leaf, causing numerous dark brown spots and yellowing.	1
 iNaturalist	An intricate honeycomb-like structure is growing out of an orange mushroom.	0 No honeycomb structure; wrong description	A yellow banana slug feeds on a light brown mushroom.	1	A bright yellow banana slug feeds on the cap of a brown mushroom growing in green moss.	1
 iNaturalist	Snail feeding on a coral reef.	0 No coral reef; wrong subject	A large slug feeds on a dead salamander on gravelly ground.	1	A large brown slug on sandy ground feeds on the carcass of a small newt.	1

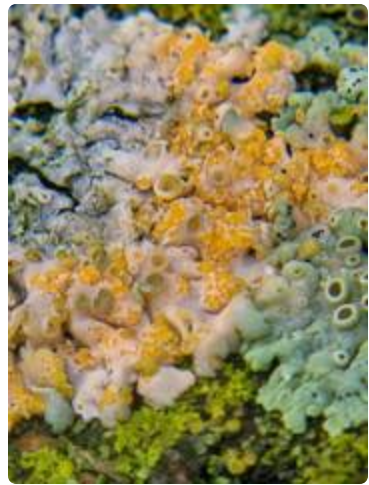

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score	Gemini 3.5 Flash	Gemini 3.5 Flash score
 iNaturalist	Insects feed on moss on lichen covered rock.	0 No insects; hallucinated feeding	A close-up of various lichens shows no visible organism feeding on another.	1	Bright orange parasitic fungus clusters grow on and feed on the surface of a pale pink lichen.	1
 iNaturalist	A red sea coral with long tentacles attached to a small white creature in an underwater environment.	0 Not red coral with white creature	A translucent sea snail is feeding on a beige anemone.	1	A shaggy white nudibranch perched on pink coralline algae feeds on a translucent, spotted sea anemone.	1

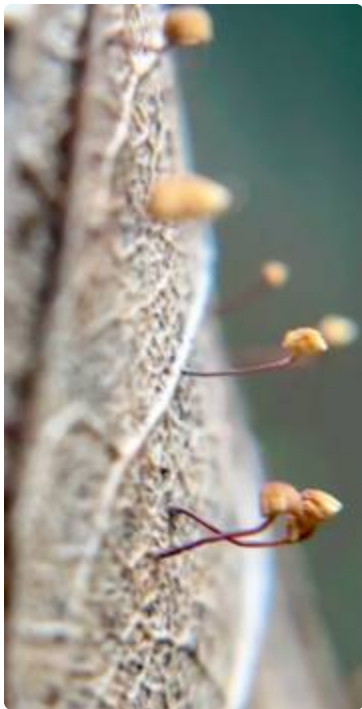

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score	Gemini 3.5 Flash	Gemini 3.5 Flash score
 iNaturalist	Mushrooms growing on tree bark.	0 On dried leaf not tree bark	Small, light-brown fungi with thin dark stems feed on a textured, dried leaf.	1	A close-up of tiny, thin-stemmed mushrooms growing out of and feeding on a decaying brown leaf.	1
 iNaturalist	Snail-like creature, possibly a slug or a snail, feeding on something that resembles mushrooms with white caps and brown stems.	0 Not a snail eating mushrooms	A dark sea cucumber feeds on a pale mass on the rocky seabed.	0 Looks like two worms/leeches, not sea cucumber	A close-up of a patterned, translucent marine worm swallowing a smooth, dark brown worm on a wet, algae-covered rock.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score	Gemini 3.5 Flash	Gemini 3.5 Flash score
 iNaturalist	The image is of coral-like growth on a tree branch with red and pink areas. It depicts an up close view of a plant, possibly coral or algae, surrounded by some sort of pink and red substance.	1	Pink growth feeding on grey-green lichens.	0 Pink is likely lichen; feeding relationship not clearly shown	A close-up of a pink parasitic fungus feeding on grey cup lichen growing on tree bark.	1
 iNaturalist	Slug on a rotten log with wood chips.	0 Not a slug; misidentifies the dark worm-like animals	A dark, spotted velvet worm feeds on a light-colored isopod amidst brown leaf litter.	1	Several blue-grey velvet worms with orange spots feed on a cricket among wet, fibrous brown bark.	1
 iNaturalist	Unidentified shellfish feeding on algae underwater coral.	0 Wrong subject; not algae, it is a conch shell	A reddish-purple sea star feeding on a conch.	1	A Triton's trumpet snail on the seabed feeds on a red starfish, with the starfish's arms protruding from the opening of the snail's shell.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score	Gemini 3.5 Flash	Gemini 3.5 Flash score
 iNaturalist	A bird pecking at rocks along a beach shoreline.	0 Misses urchins and feeding relationship	A black bird with a pink beak feeds on purple sea urchins on a rocky shore.	1	A black oystercatcher stands on a rocky shore, foraging among purple sea urchins.	1
 iNaturalist	The hand of a person holding a leaf with spots.	1	A fungus feeding on a green leaf.	1	A rust fungus infecting and feeding on the underside of a green leaf held in a human hand.	1
 iNaturalist	Man holding a plant in his hand with some form of insect or disease afflicting it.	1	Powdery mildew feeds on a green leaf held in a human hand.	1	A white powdery mildew fungus feeding on a green leaf held in a person's hand.	1
 iNaturalist	Human hand holding a plant with leaves showing signs of pestilism or damage, possibly due to caterpillars or insects feeding on it.	0 No visible damage; leaves look healthy, hand present	A tiny, pale larva feeds on a green leaf with chew marks.	0 No visible larva or chew marks on healthy leaves	A hand holds a green leaf showing small holes along its edge where insects have been feeding.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score	Gemini 3.5 Flash	Gemini 3.5 Flash score
 iNaturalist	Slug slithering down leafy branch.	0 It is a snail with shell, not a slug	A close-up of a snail feeding on a green leaf with chewed edges.	1	A snail with a translucent grey body and a brown shell feeds on a green leaf.	1
 iNaturalist	Black clam shell with seaweed on sand.	1	A clam feeding on plankton in shallow water.	0 Empty clam shell on sand; no feeding, no plankton	A bivalve clam shell, partially covered with a dark, peeling periostracum, rests on wet, bubbly sand.	1
 iNaturalist	An orange starfish with black spines is eating a small white fish.	0 Reversed; gull eats starfish, not starfish eating fish	A white bird swallows a brown starfish.	1	A close-up of a white seagull swallowing a bumpy orange starfish with several of its arms protruding from the bird's open yellow beak.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score	Gemini 3.5 Flash	Gemini 3.5 Flash score
	A bright red flower with tiny hairs at its base.	1	No visible creature is feeding on the vibrant fuchsia flower.	0 Says no feeding, but describes flower correctly overall	A close-up, macro shot of a vibrant pink thistle flower head with sharp green bracts visible in the blurred background.	0 Pink flower, not clearly a thistle; no feeding
	Small plant growing along sidewalk.	1	No feeding activity is visible in the image.	1	A cluster of tiny brown aphids feeding on the stems and buds of a green leafy plant growing next to a sidewalk.	0 Shrub by sidewalk; no visible aphids feeding

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score	Gemini 3.5 Flash	Gemini 3.5 Flash score
 iNaturalist	Butterfly feeding on purple flowers.	1	An orange skipper butterfly sips nectar from a cluster of purple flowers.	1	An orange skipper butterfly perched on a wire fence feeds on a purple wildflower.	1
 iNaturalist	Aquatic insect eats through a water body.	0 Vague and misses the feeding/prey detail	A water strider feeds on a small insect on the water's surface.	1	Two mating water striders float on the surface of calm water, with the bottom one feeding on a small insect held in its front legs.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score	Gemini 3.5 Flash	Gemini 3.5 Flash score
 iNaturalist	Brown flowering off of tree branch.	0 Called it flowering, wrong; it's a gall	Gall wasp larvae feed inside a brown, spiky gall on a thorny branch.	1	A fuzzy, brown Robin's pincushion gall, containing gall wasp larvae feeding on the host wild rose plant, hangs from a thorny twig.	1
 iNaturalist	Frogs eating insects.	0 Says eating insects, but it's another frog	A dark brown frog on gravel is swallowing a smaller, lighter-colored frog.	1	A shiny brown frog sitting on rocky ground, swallowing a spider with its legs protruding from the frog's mouth.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score	Gemini 3.5 Flash	Gemini 3.5 Flash score
 iNaturalist	Brown and white hawk perched on a tree trunk.	1	A hawk feeds on its prey, holding a bone in its bloodied beak.	0 No prey or bone visible; hawk just perched	A brown and white hawk with a blood-stained beak perched next to a textured tree trunk after feeding.	0 No blood-stained beak visible; feeding not shown
 iNaturalist	Bird sitting on tree branch holding prey in beak.	0 Says prey in beak, but held in talons	A raptor feeds on a grey squirrel on a mossy tree branch.	1	A hawk perched on a mossy branch pins a captured, bloody squirrel under its sharp yellow talons.	1
 iNaturalist	Brown and white hawk with red eye eating.	1	A hawk stands on green grass, feeding on a smaller bird with blood on its beak.	0 Hawk on grass but no visible prey bird	A brown and white streaked hawk stands on grassy ground, feeding on a small bird with bloody remains and grey feathers at its feet.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score	Gemini 3.5 Flash	Gemini 3.5 Flash score
 iNaturalist	This is an image of a small bird with a red head and white underbelly feeding on a larger bird, possibly another kind of bird or a small mammal.	0 Not feeding on a bird or mammal	A crested bird in green foliage feeds on a crab.	0 Bird eats a worm/grub, not a crab	A crested, streaked brown bird stands in thick green grass, holding a small frog in its beak.	0 Prey looks like a worm, not a frog
 iNaturalist	The image shows a plant, possibly a flower or seed pod, with various stages of growth and decay happening around it.	0 Wrong; describes a flower/seed pod	White scale insects feed on a green leaf.	1	A cluster of tiny, spiky white mealybugs feeding on the underside of a textured green leaf.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score	Gemini 3.5 Flash	Gemini 3.5 Flash score
 iNaturalist	An insect is feeding on a leaf with a lot of bugs on it.	1	A whitefly and its nymphs feed on a green leaf.	1	A tiny whitefly with translucent wings feeds on the sap of a green leaf surrounded by white, thread-like waxy secretions.	1
 iNaturalist	A small caterpillar on a leafy stem, about to be eaten by a ladybug.	0 No caterpillar or ladybug; it's a scale insect	A small, pale insect feeds on a black scale insect on a green leaf.	1	A tiny pink mite feeds on a shiny black scale insect with a white fringe on a green leaf.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score	Gemini 3.5 Flash	Gemini 3.5 Flash score
 iNaturalist	Small bee hovering near purple flowers.	1	A blurry bee feeds on purple flowers.	0 Bee is flying near, not feeding on flowers	A fuzzy honeybee in flight approaches bright purple fireweed flowers to feed on nectar.	1
 iNaturalist	A bee feeding on nectar from a flower.	1	A bee feeds on a yellow flower.	1	A honeybee feeds on the nectar of a pale yellow flower with prominent stamens, surrounded by green leaves.	1
 iNaturalist	Black and white heron standing on gravel, near street sign, with its head down to eat something it caught in the water.	0 Says heron near water, but on gravel path	A white egret stands on a gravel path, holding a dark, captured small animal in its beak.	1	A white egret stands on a gravel path, holding a captured dark rodent in its long yellow beak.	1

Image	LLaVA	LLaVA score	Gemini 2.5 Flash	Gemini 2.5 Flash score	Gemini 3.5 Flash	Gemini 3.5 Flash score
 iNaturalist	A penguin with an open beak is swimming through water.	0 Wrong; it's a duck, not a penguin	A Bufflehead duck swallows a long, dark, ribbed aquatic invertebrate.	1	A black-and-white hooded merganser swimming in calm water, swallowing a small, patterned snake.	0 Bird is a bufflehead; prey looks like fish, not a snake
